WALT2012CONGRESS

The spectrum of laser - translating basic research to clinical outcomes
September 28 – 30, Gold Coast, Australia

The congress will bring together industry professionals, clinicians, researchers, educators, decision makers and students to discuss and share information on a range of themes such as the basic sciences, dental and oral health, clinical and novel applications in areas such as physiotherapy, pain management, tissue healing, cancer care and oncology, aesthetics, rehabilitation, veterinary practice and sports performance.

The program will include internationally renowned plenary Keynote and Invited speakers, concurrent free paper sessions, workshops and opportunities to meet the experts and network with industry colleagues. A trade display will showcase an array of lasers and accessories; and poster sessions will present opportunities to discuss the most recent advances in the field. The Australian Medical Laser Association will hold a half-day pre-Congress Laser Fundamentals course (September 27, 2012); and there will be a 1.5 day pre-Congress Laser Safety course with an additional optional credentialing examination (September 26-27, 2012). Both pre-Congress activities will be at Griffith University allowing delegates to visit and experience a Top 10 Australian University. The social program promises to showcase the best of Australian hospitality and culture with a Welcome Party, Gala Conference dinner and more.

In conjunction with the World Federation for Laser Dentistry (Asia-Pacific Division) the WALT Congress is also organizing a hands-on dental Laser Accreditation Course on Thursday, September 27th. This one day intensive course will feature 8 internationally renowned speakers; provide an overview of current evidence-based clinical laser dentistry; and has been designed to offer attendees an opportunity to engage with world-leading laser dentistry experts in a unique way that will provide significant learning opportunities. (Australian Dental Association CE credit – 8 points)
